---

### PRICING

The regular PARKING fee at Lagoon is \$9.00 per vehicle. The parking fee for oversized vehicles, campers, trailers, etc., is \$12.00 per vehicle. Preferred parking, located on the north side of the ticket windows, is available on a limited basis for \$16.00 per vehicle.

The **REGULAR SINGLE DAY PASSPORT** (51" to 64 years of age) is priced at \$44.95 + tax; **KINDER SINGLE DAY PASSPORT** (4 years of age up to 50") is \$39.95 + tax; **TODDLER SINGLE DAY PASSPORT** (3 years of age and younger) is \$28.95 + tax; and **SENIOR CITIZEN SINGLE DAY PASSPORT** (65 years of age and older) is priced at \$39.95 + tax. Each **SINGLE DAY PASSPORT** includes Park Admission, Rides, Pioneer Village, Entertainment, Picnic Facilities and Lagoon A Beach Waterpark. *The "X-Venture Zone" attractions are not included with the Single Day Passports. (A child two [2] years of age and younger may enter the Park and Lagoon A Beach at no charge. To participate on rides and special events a TODDLER SINGLE DAY PASSPORT, SEASON PASSPORT, or INDIVIDUAL RIDE TICKETS are required. Individual Ride Tickets are sold 2 for \$1.00; rides vary between 4 to 10 tickets per ride.)*

# Lagoon

## STROLLERS 'N STUFF

Lagoon offers a variety of rentals at **Strollers 'N Stuff**, located just inside the gates at the front entrance on the south side. Wheelchairs, strollers and wagons are rented on a first-come, first-served basis, and may not be reserved in advance. A Daily Rental Fee and Deposit are required with all rentals. Wheelchairs require daily rental fee plus a deposit of a credit card. Rental items are not permitted to leave the park property.

## THERE'S ONLY ONE LAGOON!

Lagoon is easy to find. Lagoon is located in Farmington, Utah, midway between Salt Lake City and Ogden. **Northbound I-15** – Take the “**200 West**” Exit #322. **Southbound I-15** – Take the “**Park Lane**” Exit #325. Driving time from either city is approximately 20 minutes. There are a number of good hotels in the Salt Lake City and Ogden areas. It is always wise to make your reservations well in advance. Check [lagoonpark.com](http://lagoonpark.com) for information on “**STAY 'N PLAY**” packages.

Bus transportation is available from Salt Lake City or Ogden to Lagoon with the Utah Transit Authority (UTA), Route 70. We suggest you check with the UTA at **801-743-3882**, or on-line at [rideuta.com](http://rideuta.com) for schedule times and other information.

**Lagoon's R.V. Park and Campground** is a full-service campground adjacent to Lagoon. Reservations are suggested. Please call **801-451-8100**.

## HELPFUL HINTS

To make your stay more enjoyable, here are a few facts and suggestions to help in planning your day. Families should plan to spend a minimum of eight hours at Lagoon, Pioneer Village, and Lagoon A Beach. Pioneer Village alone, could turn into a one-day adventure. In planning your trip to Lagoon you may wish to consider a day other than Friday or Saturday. Fridays and Saturdays have traditionally been the “busiest” days at Lagoon. Sundays through Thursdays tend to be much “lighter.”

Before entering onto the Park, be sure your family or group has a definite time and place to meet later in the day. We suggest you avoid the entrance area as a meeting place, as it is usually crowded in the evenings.

Lagoon honors VISA, MasterCard, American Express and Discover Cards. Credit and Debit/ATM cards are honored at all ticket locations and major food and gift shops. ATMs are available on the Park. Checks are not accepted.

# Lagoon

Information dealing with Lagoon's Disabled Services and Restrictions is available at **Guest Services** or at any ticket window. Entertainment Guides are available through **Guest Services**, any ticket window and at Entrance Gates. Entertainment scheduled for the day is also posted on signs throughout the Park.

Shirts and shoes are required at Lagoon. Appropriate swim wear (no cutoffs or jeans) is required for guests of Lagoon A Beach. No alcoholic beverages or glass bottles are allowed into Lagoon A Beach.

Child care and nursery facilities are not provided inside the Park.

Small children who become separated from their parents are taken to **Safety and Security**. There they are entertained until reunited with family. Sorry, we cannot page for lost or separated parties.

Food stands are located throughout the Park. Pizza, hamburgers, tacos and other food items are found at a number of stands. In keeping with Lagoon's policy as a family entertainment center, alcoholic beverages are not sold on the Park. Diet drinks are available. Coca-Cola® is the official soft drink of Lagoon. All major food stands now accept debit cards.

If you wish to bring your own food, we suggest you leave it in your vehicle until mealtime. Picnic areas are available for your use, free of charge, throughout the east section of the Park. These are on a first-come, first-served basis. Previously reserved areas are designated with signs and paper-covered tables. These are only available for the reserved group(s). Barbecue grills (propane, gas, charcoal, etc.) are not allowed.

If you plan on leaving Lagoon, even for a short time, you may do so. Use your handstamp and ticket receipt received upon entering as your re-entry pass. Please re-enter through Gate #10, located on the north end of the entrance gates. Cars can leave and re-enter with ticket receipt or handstamp and paid Parking receipt.

Kennel facilities are not provided by Lagoon. You may, however, take your pet onto the Park, provided the pet is on a leash and under control at all times. Pets may not be taken into the Lagoon A Beach facility.

# Lagoon

## A CAPSULE HISTORY OF LAGOON

In the late 1800s, a number of recreational resorts sprang to life along the shores of the Great Salt Lake. One of these was the original Lagoon, then called "Lake Park." It was *"one of the most attractive watering places in the West,"* opening to the public on July 15, 1886. Lake Park featured an open-air dancing pavilion with delicately carved lattice work and archways. Summer cottages on the Lake were rented to guests by the week or month. For a 50¢ admission, a guest could enjoy swimming, dancing,

boating, riding the mule-drawn merry-go-round, roller skating, target shooting, and bowling alleys. Another 50¢ bought a full-course dinner in Lake Park's restaurant. By the end of its first season, 53,000 guests had visited Lake Park. In 1893, the Great Salt Lake began receding, leaving a sticky, blue mud that was miserable to swimmers and guests. In 1896, Lake Park was moved two and one-half miles inland to its present location, and the name was changed to "**Lagoon**" to suit its new home on the banks of a 9-acre lagoon.

Row boating, swimming, and of course, dancing were the attractions that brought the crowds via the Bamberger Railway to enjoy Lagoon. A round-trip on the Bamberger Railway from Salt Lake to Ogden cost 25¢ for each rider. Within a few years, Lagoon could brag that there was a paved road all the way from Salt Lake City to Lagoon.

Lagoon's first thrill ride, the Shoot-the-Chutes, was soon in operation, and by 1906, the scenic Bamberger Railway was the thrill of its day. Later that same year, a new Carousel with 45 hand-carved horses and characters was delivered and installed. That same carousel is still in operation today. In 1921, the roar of the Roller Coaster began, and the excitement experienced on this ride hasn't stopped since. In 1927, the million gallon swimming pool refreshed guests on hot summer days in "water fit to drink."

# Lagoon

During the '30s and '40s, the Dancing Pavilion inaugurated the Big Band Era with the hottest band of the day, Artie Shaw. The Railway stopped running to Lagoon in 1952.

In October of 1953, the night sky of Farmington was red and smoking. Lagoon was on fire. The flames were so high, they could be seen 20 miles away in Salt Lake City. Fire swept down the west side of the midway destroying everything in its path. The front of the Roller Coaster was consumed, and the Fun House and Dancing Pavilion (with its many memories)

were reduced to rubble. The Carousel was saved by firefighters spraying a constant stream of water over its roof. Before the smoke had cleared, Lagoon's then president, Robert E. Freed, vowed to rebuild a new Lagoon, which was the beginning of the Lagoon that we know today, with new attractions and features to premiere each season. Lagoon installed the Speedway Senior ride. The youngsters were not forgotten with the creation of Mother Goose Land (an area filled specifically with children's rides and attractions). A showboat cruised Lagoon lake in search of an elusive dragon, while the Lake Park Streamliner train circled on shore.

The Patio Gardens became the concert spot of Utah during the '50s and '60s. Such luminaries as Ella Fitzgerald, Louis Armstrong, Johnny Mathis, Frankie Avalon, The Everly Brothers, and even the Three Stooges, Benny Goodman, Duke Ellington, Count Basie, and the Glenn Miller Orchestras appeared at Lagoon. Legends of Rock 'n' Roll including Bill Haley and the Comets, Jimi Hendrix, Janis Joplin, The Rolling Stones, The Doors, and the Beach Boys, were among those who entertained Lagoon's guests. In the late '70's, the Patio Gardens was converted into a roller rink, and today it is the Game Time Arcade.

In 1968, the Lagoon Opera House promoted and pioneered Utah summer theater, presenting such plays as *Joseph and the Amazing Technicolor Dreamcoat*, *A Funny Thing Happened on the Way to the Forum*, and other Broadway hits.

Old and new merged in 1976 with the acquisition of Pioneer Village, a 6-acre restoration of **Pioneer Utah**. This outstanding preservation of history includes one of the country's finest collections of horse-drawn carriages, a renowned gun collection, and many other interesting exhibits of pioneer artifacts. Guests stroll through the pioneer town enjoying the history on display for all to see.

# Lagoon

In 1982, Lagoon began to expand its live entertainment program with the presentation of Music USA. Now, Lagoon offers a variety of singing, dancing, and musical performances as part of the Lagoon experience.

Lagoon has always been synonymous with water fun since the early days of Lake Park in 1886. Lagoon continued the tradition with the installation of the

**Lagoon A Beach Waterpark.** Arriving in 1989, this extraordinary waterpark features every twist, turn, and splash available in the water fun market. A lazy river, the Outrigger, tube, speed, and serpentine slides, and the pools are but a few of the many activities awaiting guests at Lagoon A Beach.

More recently, new attractions on the park include Wicked (Lagoon's Biggest Coaster), OdySea, Jumping Dragon, BomBora, Colossus – the Fire Dragon (a double-loop, steel roller coaster), Skycoaster, Rattlesnake Rapids, Wild Mouse, The Rocket, Double Thunder Raceway, Samurai, Cliffhanger, The Bat, The Catapult, The Spider, and 2012's new – **AIR RACE!**

When it comes to family entertainment, Lagoon has all the bases covered. Picnic pavilions are available for family parties and get-togethers. Mother Goose Land and Bongo's Bay in Lagoon A Beach are specifically intended for the enjoyment of small children. Lagoon offers over 100 acres of excitement and fun. Rides, games, food facilities, Pioneer Village, Lagoon A Beach, and shops provide guests with a wide variety of experiences. Lagoon offers delicious food from franchises such as Subway®, Arbys® and Teriyaki Stix®. Lagoon also offers meals featuring barbecued ribs and chicken, as well as the traditional fare of hamburgers, hot dogs, and fluffy cotton candy. It all adds up to a world of Family Fun. Come and enjoy the adventure that is Lagoon.

# AIR RACE

**NEW FOR 2012!**

**AIR RACE** delivers an exciting ride experience combined with an impressive visual impact; it takes riders on an amazing journey which replicates the thrill and sensations of an acrobatic airplane flight, with banks, loops, dives, and weightlessness that will test even the most enthusiastic thrill seekers. Accommodating up to 24 riders in six four-seater airplanes, this electrifying ride combines a 6 rpm rotation with a motor driven sweep undulation that provides the various multi-vectored sensations observed by riders. The action takes place up to 26 feet above the ground, and riders (“pilots”) feel the accelerations of almost 4G, right-side-up and upside down. The over-the-shoulder restraints incorporated into the seats hold riders during the amazing simulated flight. Guests under 48 inches in height may not ride.

To participate on **AIR RACE**, you must be in good health and free from heart conditions, neck and back injury, and other physical limitations. Prior to riding, we suggest that guests observe **AIR RACE** in operation to determine its suitability relative to their own physical condition. Please consider your physical condition and any other personal physical limitations in deciding whether to board **AIR RACE**.

We suggest that elderly persons and expectant mothers refrain from riding. Guests under 48 inches in height may not ride. To ride, each rider seat restraint must be securely closed and locked. Please obey all instructions given by the ride operator and attendants.

Due to the nature of this ride, loose or hand-held articles, such as cameras, cellular telephones, stuffed animals, keys, glassware, etc. cannot be accommodated. Loose items must be left with a non-rider. Ride attendants may not hold personal items for riders, and are not responsible for lost, stolen, or misplaced items.

## **GENERAL SPECIFICATIONS**

- Ground Dimensions 52 feet diameter to center of gondola body at rest.  
82 feet operational diameter.
- Operating Height 29 feet height of gondola; 42 feet top of tower.
- Center Rotational Speed Programmed steady speed, max 6 rpm.  
Gondola ranging from 0 to 20 rpm.
- Number of Gondolas 6 gondolas with individual seating (four individual seats per gondola in two stadium row styles).
- Rider Seating Capacity Four individual seats and restraints each gondola.
- Hourly Capacity Approximately 480 riders per hour.
- Height Restriction Under 48 inches may not ride.
- Year Installed 2012

**BOMBORA** is a dynamic coaster with numerous state-of-the-art high speed thrilling elements including sudden drops, banked turns, compound spirals, and more. An innovative 16-seat train pairs riders side by side accompanied by rocking music and elegantly lighted theming. The amply padded seat and restraint securely holds riders at the waist to provide exhilarating upper body freedom during the ride. Each seat may accommodate an adult or child rider.

To experience **Bombora**, you must be in good health and free from heart conditions, neck and back injury, and other physical limitations. Prior to participating, we suggest that guests observe **Bombora** in operation to determine its suitability relative to their own physical condition. Please consider these and other physical limitations in making your decision whether to participate on this attraction.

Due to the nature of this ride, loose or hand held articles must be left with a non-rider or in a locker located at the ride exit.

**Bombora** is included with your Single Day and Season Passports.

#### **GENERAL SPECIFICATIONS**

- Footprint: 100 feet x 165 feet
- Highest Height: 50 feet
- Speed: 31 mph
- Length of Track: 1,040 feet
- Ride Seating Capacity: Two trains, 16-riders each
- Hourly Capacity: Approximately 950 riders per hour
- Height Restriction: Under 36" may not ride. Between 36" and 48" must be accompanied by a responsible person
- Year Installed: 2011

The **JUMPING DRAGON** was Lagoon's new ride in 2009. This roundabout motion ride is circular with hills and dales creating considerable centrifugal force. The ride quickly accelerates and will run both forward and backward.

The dragon consists of a large, ornately decorated serpent-like figure with 18 carriers imbedded in its undulating body, culminating dramatically in a whipping upward 15 foot tail. As the dragon circles round and round chasing its tail, it leaps up to two meters and travels through a Chinese pagoda that is over 40 feet tall.

Seats are equipped with adjustable, locking restraints to securely hold riders. Each rider compartment will accommodate two riders – two adults, or an adult and child. Children under 46 inches in height must sit in the inside seat and be accompanied by a responsible person.

Within the queue, guests waiting to ride will walk past Foo Dog sculptures wishing them good luck. Next to the ride is a mysteriously beautiful dragon path. Those who dare, enter a spectacular sculpture of a dragon through its mouth.

**Jumping Dragon** is included with your Single Day and Season Passports.

#### **GENERAL SPECIFICATIONS**

- Ground Dimensions: 58 foot radius
- Operating Height: 18 feet (top of tail of dragon)
- Ride Seating Capacity: 18 gondolas with 2 seats each, 36 riders
- Hourly Capacity: Approximately 720 riders per hour
- Speed: Up to 13 rpm
- Height Requirements: Under 46" must be accompanied by a supervising companion.
- Year Installed: 2009

# ODYSEA AT LAGOON

**ODYSEA** is an exciting family interactive ride. Guests will enjoy flying as they control the vertical motion of their vehicle. During the course of the ride, riders will receive a warning from the vehicle communication system that spitting fish will be spraying streams of water into the ride path. Lighted arrows on the vehicle dashboard will direct riders to dive or climb to avoid contact with the water. Guests will have their flying skills tested if they are to avoid the streams of water. There will be some that experience the contact with a refreshing water spray from the spitting fish. Seats are equipped with an adjustable locking restraint to securely hold riders. Each gondola will accommodate two riders, adult or child. Children under 46 inches in height must sit on the inside seat of the gondola and be accompanied by a supervising companion next to them.

Due to the nature of **OdySea**, loose or handheld articles such as cameras, cellular telephones, stuffed animals, keys, glassware, etc., must be left with a non-rider. Ride attendants may not hold personal items for riders and are not responsible for lost, stolen, or misplaced items. There is a good chance riders will get wet.

**OdySea** is included with your Single Day and Season Passports.

## GENERAL SPECIFICATIONS

- Dimensions: Operating diameter, 67 feet  
Height, 22 feet
- Gondola Lifting Height: 20 feet
- Ride Seating Capacity: 12 gondolas with 2 seats each, 24 riders
- Hourly Capacity: Approximately 576 riders per hour including loading and unloading time
- Speed: Lifting speed 3.3 feet per second  
Gondola speed, 18 feet per second
- Height Requirements: Under 46" must be accompanied by a supervising companion.
- Year Installed: 2008

# Wicked

## COASTER

### GENERAL SPECIFICATIONS

- Dimensions: 112 feet x 404 feet
- Highest Height: 110 feet high
- Length of Track: 2,000 feet long
- Speed: 55 mph
- Max G-Force: 4.85 g
- Height Requirements: Under 46" may not ride. Between 46-50" must sit in designated seats and be accompanied by responsible person.
- Approximate Cost: \$10 million
- Year Installed: 2007

*Manufactured by Zierer, Germany*

It's BIG, it's FAST, it's **WICKED!** Lagoon's most thrilling coaster, EVER! This state-of-the-art coaster will thrill riders of all ages with its unique ride elements. Riders are launched to the top of the 110 ft. tower at speeds close to 41 mph. This element is especially unique as most roller coasters slowly lift riders to the top of the first hill, letting gravity do the rest. **Wicked** riders will instead be propelled by means of a linear synchronous motor (LSM) drive system, essentially rocketing riders up and over the top of the first hill.

The 8-rider vehicles travel individually and achieve speeds up to 55 mph, passing through steep valleys, high bank turns, a half-pipe, heart-roll inversion and more. Riders will be seated in two rows of four, facing forward, with the back row seats elevated above the front row. The lap/leg restraints will provide an exhilarating upper body freedom for riders. **Wicked** is included with your Single Day and Season Passports.

# Dinosaur Drop & Ladybug Bop

The **DINOSAUR DROP** and **LADYBUG BOP** consist of two semi-independent vertical fall towers. These are family rides that may appeal to all ages. Each ride has five double seats attached to a motorized ring driven around each vertical tower. Both towers offer several different ride programs, both vertical and rotational movement can be controlled, providing different ride experiences. The **Dinosaur Drop** and **Ladybug Bop** are included with each Single Day and Season Passport.

## GENERAL SPECIFICATIONS

- Dimensions: Width – 18 feet  
Depth – 18 feet  
Height – 39-45 feet
- Gondola Lifting Height: 27 feet high
- Gondola Capacity: 10 riders  
1 gondola, 5 seat units with 2 seats each
- Hourly Capacity: Approx. 360 riders per hour including loading & unloading time
- Height Requirements: 36" to 42" must be accompanied by responsible person
- Year Installed: 2006

# The Bat

*Manufactured by Vekoma Rides Manufacturing B.V.  
Vlodrop, Netherlands*

**THE BAT** is Lagoon's first suspended coaster that provides fun for the whole family to enjoy. Riders are suspended – feet dangling – below 1,122 feet of twisting track that banks and weaves through the trees creating an exciting sensation of flying.

**The Bat** is unlike any other ride or coaster at Lagoon and is included with each Single Day and Season Passport.

## GENERAL SPECIFICATIONS

- Footprint: 194 feet x 122 feet
- Highest Height: 48.6 feet high
- Length of Track: 1,122 feet long
- Capacity: 650 passengers per hour
- Number of Coaches: 10 coaches on train
- Height Requirements: Under 42" may not ride
- Approximate Cost: \$3 million
- Year Installed: 2005

# Interactive Water Attraction and Show

In 2004 Lagoon added a spectacular new water feature that's located just inside the entry of the park. This interactive water attraction reestablishes a strong entrance to the park and welcomes visitors with a visually exciting display. It features stone paving and walls from India, and uses over 190 nozzles positioned to create a 30-foot diameter "water cage" with a 60-foot "leaping" water tunnel.

Lagoon entertains guests with daily and nightly dynamic water productions programmed to music. Theatrical lights provide color and at the center of the water cage, jets force water 35 feet in the air producing an eye-catching show. During the remainder of the day, the water feature provides a fun, interactive water experience for visitors to enjoy.

This interactive fountain also includes over 80 lineal feet of water walls along with two memorial water garden features, one of which incorporates 15 custom wave nozzles to create a crashing wave effect. In total, there are over 18 separate pumps capable of producing 350,000 gallons of water per hour.

There are two special water features that flank the fountain. The first is a 36" diameter sphere that rolls on a water base. The sphere is made from colored Meerfelsen granite from Sweden.

The second feature is a beautiful 60" ring on a rotating base. The ring is made from Verde-Candaia granite imported from Brazil. The stone for the sphere and the ring were shipped to Germany, where they were cut to fit with Furstensteiner granite stone bases. Both features rotate on a thin water film and will allow direct patron contact that will provide fun for all ages.

The new water plaza celebrates the life of Robert E. Freed, under whose vision and innovation Lagoon

operated from 1946 until 1974. A man of integrity, he was a leader in the international amusement industry and a pioneer in Utah civil rights. Robert E. Freed loved and contributed to the world of art and entertainment, his family, his community, and his country. From his loving family, this beautiful attraction is provided for Lagoon guests to enjoy in his memory.

## GENERAL SPECIFICATIONS

- |                          |  |

# The Kontiki

*Manufactured by Zierer in Germany*

**THE KONTIKI** is an island themed boat ride that both children and adults can enjoy. The ride simulates a trip on the ocean in an island boat. As it starts out, the boat begins swinging with a seesaw, back and forth motion that suddenly turns into a churning experience as though caught in an ocean whirlpool. A combination of swinging and rotational motions create a unique ride experience.

The boat is log themed with a sail and lion heads on each end. It consists of six bench seats, three on either end facing the center. Palm trees with coconuts, tiki heads, and sand with lava rock, add to the attraction decor.

Ride experience differs depending on guest seating in the boat.

**The Kontiki** is included with your Single Day and Season Passports.

## GENERAL SPECIFICATIONS

- Footprint: 15 meters long x 10 meters wide x 5.7 meters high
- Number of Riders: 24 children or 8 adults and 12 children
- Potential Capacity: 600-700 riders per hour
- Height Requirements: Less than 46" must be accompanied by an adult
- Year Installed: 2004

# The Dragonfly

*Manufactured by Eli Bridge Company of Jacksonville, Illinois*

**THE DRAGONFLY** is a fun new swing ride for kids and adults. Lagoon employees developed and designed the theme for this new ride, in addition to creating the Dragonfly that sits on top of the ride. Weighing 200 lbs., the 12-foot long Dragonfly has a wing span of 16 feet. Guests access the ride through a custom-made, colorful entrance enhanced with friendly bugs and flowers.

**The Dragonfly** consists of 24 seats suspended by chains from three rotating arms which rotate around a center mast. Riders experience a smooth orbiting ride with mild centrifugal forces. The ride experience is smooth and non-threatening to children. **The Dragonfly** is made by the same manufacturer which created Lagoon's Space Scrambler in 1961 and is included with your Single Day and Season Passports.

## GENERAL SPECIFICATIONS

- Footprint: 49 feet wide x 52 feet deep x 35 feet high
- Rider Capacity: 48 Children/24 Adults
- Chair Capacity: 2 Children/1 Adult
- Potential Capacity: 1,200 Children/600 Adults per hour
- Height Requirements: Guests under 36 inches in height may not ride. Due to the design of the seat and restraint system, exceptionally large and/or tall guests may not be able to ride.
- Year Installed: 2004

Lagoon

# The Spider

*Manufactured by Maurer Sohne, Germany*

A first of its kind in North America, this spinning coaster takes riders to a new extreme. Four passengers load into the coaster car – two facing forward and two facing back. The car remains in this locked position as it descends the initial drop. As the car begins to ascend the second hill it then unlocks, allowing free horizontal spin – up to 20 rotations per minute depending on weight and gravity!

With unique track configurations, which include an 82 degree embankment called the Immelmann, a stretch of slalom track, and a 360 degree carousel turn, riders are given a truly unique experience.

**THE SPIDER** is included with Season and Single Day Passports.

## GENERAL SPECIFICATIONS

- Footprint: 78 feet x 146 feet
- Highest Height: 53 feet high
- Length of Track: 1,414 feet long
- Top Speed: 38 miles per hour
- Capacity: 900 passengers per hour
- Number of Cars: Eight (8) four-passenger cars
- Maximum Banking: 82 degrees
- Minimum Slope: 50 degrees
- Height Requirements: 46-50 inches must be accompanied by an individual over 50 inches in height. Riders over 50 inches may ride alone. Under 46 inches may not ride.
- Approximate Cost: \$3 million
- Year Installed: 2003

**Lagson**

# Colossus: The Fire Dragon

*Manufactured by the Anton Schwarzkopf Company.*

The **FIRE DRAGON** was selected by *People Magazine* in 1984 as one of the top 10 coaster rides in the country! This ride will have you racing upside down through breathtaking 65 foot diameter loops where 75% of your body's weight will be pressed into the seat... Don't even think of standing up!

Located on the South Midway area of the Park, this roller coaster is one and a half times as high as the existing Roller Coaster and twice as high as the Jet Star 2. The **Fire Dragon** consists of three trains; each holds 28 passengers. In operation at Lagoon, the capacity for the **Fire Dragon** is 1,600 passengers per hour. The ride is almost totally automated; and is run by a computer, however, 4 to 6 operators and attendants are also on site to operate the ride.

The **Fire Dragon** is included with Season and Single Day Passports.

## GENERAL SPECIFICATIONS

- Highest Height: 85 feet high
- Length of Track: 2,850 feet long
- Speed: 55 miles per hour
- Original Cost: 2.5 million
- Year Installed: 1983
- Duration of ride: 1 minutes 45 seconds
- Lights: 12,000 +

Lagoon

# The Catapult

*The Catapult is an X-Venture Zone attraction and not included with Lagoon's Season or Single Day Passports.*

In the amusement industry, **THE CATAPULT** is frequently called the world's hottest new attraction, providing riders a unique, high adrenaline, vertical experience. **The Catapult**, manufactured in Europe, utilizes a specially designed spring machine that operates by applying over forty (40) tons of force to extension springs. This incredible propulsion energy is then transferred to the rider capsule prior to launch. When launched, riders will experience forces similar to astronauts as they are rocketed from ground level to well over 200 feet in the air. At the highest point, riders will become weightless momentarily as they freely rotate forward and backward before they are pulled back to Earth. After several oscillations up and down, the capsule is lowered to the boarding area to unload and load another group of riders.

**The Catapult** is designed and manufactured to the highest amusement industry safety standards including the A.S.T.M. standards of the U.S. and the T.U.V. standards of Europe. The two riders are secured in the capsule seats by full harness restraints with multiples, redundant locking mechanisms for safety and comfort. Four independent steel cables connect the rider capsule to the spring machine and all connections consist of two independent systems to maximize rider safety. All ride systems are monitored and controlled by an integrated computer to provide every rider, whether light or heavy, the same amount of thrust.

## ***Additional Features:***

The Capsule includes several battery operated strobe lights for visibility at night and a high resolution video camera and microphone with remote broadcast capability to transmit video of riders in the capsule to monitors on the ground. Prepare to be blasted!

### **GENERAL SPECIFICATIONS**

- Tower Height: 196 feet
- Maximum Capsule Height: 250 feet
- Number of Capsules: 1
- Number of Seats: 2
- Height Restrictions: Under 46" may not participate
- Cycle Time: Approximately 2 minutes
- Year Installed: 2002

# The Cliffhanger

Added in 2001, the **CLIFFHANGER**, consists of two seat gondolas, accommodating 20 guests each, connected to a large mast that turns and rotates the gondolas. The operation of the ride produces a rocking, somersault experience in both the forward and reverse directions. Each gondola may be locked in position or allowed to turn during the ride cycle. The gondolas may swing freely and/or rock back and forth with the turning of the ride. The **Cliffhanger** has a water feature that operates with the ride, and through which the gondolas may travel. You will get wet, possibly soaked as the gondolas pass through the water.

To experience the **Cliffhanger**, you must be in good health and free from heart conditions, neck and/or back injury, and other physical limitations. Enjoy the ride!

The **Cliffhanger** is included with Season and Single Day Passports.

## GENERAL SPECIFICATIONS

- Number of Gondolas: Two
- Seats: Forty
- Hourly Capacity: 1,000 persons
- Height Restrictions: Guests must be 50 inches or taller to ride
- Year Installed: 2001

# The Rocket

**THE ROCKET** was Lagoon's new attraction for the 1999 season. It is made up of three independent structural steel towers 217 feet tall. Two of the three towers are tracks for two very different thrill rides.

## **ROCKET BLAST OFF:**

This ride accelerates guests (12 at a time) from ground level to 200 feet straight up in less than 3 seconds. The initial powered blast creates a force on the rider of 4.5 G and upon reaching the top position, guests are blasted downward with a 2 G-force. They are slowed by gradually increasing pressure as they enjoy several air-cushioned bounces up and down the tower.

## **ROCKET RE-ENTRY:**

This ride is similar to the "Blast Off" but it works in the opposite direction. Guests are slowly raised to the top of the 200 foot tower in approximately 20-25 seconds and are then blasted downward. As they near the bottom of the tower they enjoy several air-cushioned bounces experiencing 4.5 G-force as they are slowed by gradually increasing pressure.

**The Rocket** was manufactured by S & S Sports Tower located in Logan, Utah. They currently have approximately 60 towers in 16 different countries around the world.

**The Rocket** is included with Season and Single Day Passports.

## **GENERAL SPECIFICATIONS**

- Height of Towers: 217 feet each
- Passenger Capacity: 12 guests per tower
- Capacity per Hour: 900 passengers
- Acceleration: 4.5 G-force
- Year Installed: 1999

# Samurai

During the 2000 summer season Lagoon added the **SAMURAI** attraction. The **Samurai** consists of six radial arms which spin as the entire ride rotates through an oval arc. The ride may be programmed to operate in either direction. As the centrifugal forces increase, the entire ride rises to a near vertical position and the gathering forces allow each arm to freely rotate. The sensation of flying and performing loops is achieved in a smooth, yet thrilling experience.

To experience the **Samurai** you must be in good health and free from heart conditions, neck and back injury, and other physical limitations. Prior to participating, we request that guests observe the attraction in operation to determine its suitability relative to their own physical condition. Please consider these and any other physical limitations in making your decision whether to participate on this attraction.

We suggest that elderly persons and expectant mothers refrain from riding. Guests under 50" in height may not ride and guests under 54" in height shall ride in designated seats. Each rider must occupy their own seat, no lap riding is allowed. Due to the design of the ride restraint system, exceptionally large people may not be allowed to ride. The safety restraint system must be adequately secure. Please obey all instructions given by the ride operator and attendants.

Due to the nature of this ride, loose or hand-held articles such as cameras, cellular telephones, pagers, stuffed animals, and glassware are not allowed on the ride, and such items must be left with a non-rider. Ride

attendants may not hold any personal items for riders, and are not responsible for lost, stolen or misplaced items.

Don't lose your Sushi!

The **Samurai** is included with Season and Single Day Passports.

**Lagoon**

# Wild Mouse

The **WILD MOUSE** is a full-fledged fun trap that is sure to send your tail spinning. Strap yourself into a one-car coaster and hold on tight as you climb, drop, and spin your way back to the surface 50 feet below. The all-new **Wild Mouse** is so wild, so crazy, you'll squeak with glee!

The ride contains three distinct phases. The first phase will rush riders through a three-tiered configuration containing seven 180 degree turns. The second phase will treat riders to negative g-forces and a straight section of track with several camel back hill effects. The last phase is the ride's braking zone.

The **Wild Mouse** is included with Season and Single Day Passports.

## GENERAL SPECIFICATIONS

- Highest Height: 50 feet
- Maximum Speed: 28 miles per hour
- Capacity: 1,030 persons per hour
- Length of Track: 1,200 feet
- Cars: 8 four-passenger cars
- Manufacturer: Maurer Sohne
- Year Installed: 1998

Lagoon

# Rattlesnake Rapids

New at Lagoon for the 1997 Season, **RATTLESNAKE RAPIDS** is a river raft ride designed to transport park guests down 1/3 of a mile of lightning-quick water. **Rattlesnake Rapids** is located at the east end of Pioneer Village. Up to nine people can ride on a circular raft that carries them through rapid white water, rising swells and splashy waterfalls. The rafts travel in ever-changing directions, from left to right, backwards and forwards, and up and down. Rafter should expect to get wet, maybe even soaked!

The river channel is built of concrete and white water effects are created by the placement of specially

designed barricades and obstacles throughout the waterway. Don't forget to watch out for the waterfalls and other surprises on this swirling, swooshing, splashing, thrilling, white water rafting ride.

At the end of the turbulent river, the rafts are guided onto a wooden conveyor lift and are brought up to the revolving platform where guests are unloaded, and new guests are loaded, while the platform constantly rotates.

**Rattlesnake Rapids** is included with Season and Single Day Passports.

## GENERAL SPECIFICATIONS

- Water: 1.2 million gallons
- Length of River: 1,625 feet
- Rafts: 15 nine-man rafts
- Capacity: 1,500 persons per hour
- Pumps: Three at 215 horsepower each
- Duration of Ride: Five to six minutes
- Manufacturer: Intamin Company
- Year Installed: 1997

# Roller Coaster

*Designed by John Miller*

Almost 90 years old, the Lagoon **ROLLER COASTER** remains one of the most popular attractions at the Park and is one of only a few wooden coasters between Denver and the West Coast. In 1953 a fire destroyed the front of this coaster. It was rebuilt the following year, and sections of the **Roller Coaster** are rebuilt from year to year. To ensure the safety of this ride, the morning begins very early for some people. The tracks are walked and thoroughly checked over each day before being put into use for the public.

The **Roller Coaster** was designed by John Miller, who also designed coasters at Coney Island. The wooden **Roller Coaster** consists of two trains. Each train is made up of four cars, with six passengers to a car. In operation at Lagoon, the capacity for this coaster is 1,920 passengers per hour, per train. The **Roller Coaster** is included with Season and Single Day Passports.

## **GENERAL SPECIFICATIONS**

- Highest Height: 60 feet high
- Length of Track: 2,500 feet long
- Speed: 45 miles per hour
- Built in: 1921
- Duration of Ride: 1 minute 56 seconds
- Year Installed: 1921

# Jet Star 2

*Manufactured by the Anton Schwarzkopf Company.*

The **JET STAR 2** is a high speed roller coaster type ride. It starts by spiraling up a steel track to the top of the ride. At this point the cars cascade down and around the track at varying angles. There are eight cars which require six passengers each; two passengers per seat section. In operation at Lagoon the capacity for the **Jet Star 2** is 1,680 passengers per hour.

After this coaster's six-month run at the 1974 Expo in Spokane, Washington, it was moved to Lagoon and reerected for the 1976 summer season. In 1991 part of the track was rebuilt by Fabri-Weld.

**Jet Star 2** is included with Season and Single Day Passports.

## GENERAL SPECIFICATIONS

- Highest Height: 45 feet high
- Length of Track: 1,900 feet long
- Speed: 45 miles per hour
- Duration of ride: 1 minutes 30 seconds
- Year Installed: 1976

# Lagoon A Beach

## 550,000 GALLONS OF FUN!

In the summer of 1989, Lagoon welcomed **LAGOON A BEACH** to its line-up of thrills, chills, and entertainment. It promised to be the most exciting season at Lagoon since 1886, when sunbathers flocked to the original Lagoon (then called Lake Park) on the shores of the Great Salt Lake. More than 6 acres of the Park were transformed into the hottest beach front property this side of the California coast! **Lagoon A Beach** has hundreds of thousands of gallons of water fun; for swimming, soaking, floating, splashing and sliding, to sunning, eating and volleyballing the day away.

**Lagoon A Beach** has something for everyone including some great slides! For thrill seekers, there are three “serpentine” slides that drop you from a 56 foot tower, and send you twisting and splashing to the bottom. Two of these slides require a tube and one is a body slide. For those even more daring at heart, there are two “drop slides” which produce the sensation of falling straight down until you glide smoothly to a stop in the splash pool below. There are “pipeline” slides, and the “Outrigger” slide which uses a tube and has six splash pools on the way down.

For a “totally tubular” time, ride a jet stream of water 65 feet down through four twisting, turning, totally-enclosed tubes. Or if a tranquil river is more your pace, relax and float in the Lazy River, surrounded by crystal waterfalls, exotic tunnels, tropical lagoons, and a castaway island for kids!

**Lagoon A Beach** features two activity pools for water lovers of all ages. The south activity pool is a tropical oasis where you can relax and swim. The second activity pool is especially for kids. This pool features a castaway island of fun with tunnels, bridges, slides, swings, and a giant spouting volcano!

If catching rays is more your scene, **Lagoon A Beach** is the hottest tanning spot in Utah with enough coastline for lounge lizards to soak up the sun. With sundecks and lots of lounge chairs, guests can laze away the day enjoying the sun and the sights poolside or in the relaxing grassy area.

**Lagoon A Beach** is the spot for everyone who likes the sun, water and fun. It’s a refreshing diversion on a hot summer day!

**Lagoon A Beach** is included with Season and Single Day Passports.

# Pioneer Village

Memories of the Old West abound at Lagoon each summer as Pioneer homes, businesses, and antique artifacts transport the Lagoon guest 100 years back in time.

**PIONEER VILLAGE** is the reconstruction of a typical frontier community as it might have existed in the late 1800's. Guests take a stroll along rustic wooden sidewalks, shop for gifts and frontier treats in authentic 19th century stores and buildings. This community consists of 42 buildings and the artifacts with which they may have once been furnished.

**Pioneer Village** features one of the finest collections of small arms in the country, including guns, slingshots, crossbows and cannons. The Carriage Hall features almost every type of wheeled conveyance used at the turn-of-the-century. One of the carriages was owned by William Stanton, the controversial Secretary of War for Lincoln from 1862 through 1867. The carriage was in the Stanton family until Lagoon obtained it.

A Rock Chapel stands at the head of **Pioneer Village**. Originally constructed in Coalville, Utah in 1853, the building was first used as a fort against the Indians. It later became a courthouse, a schoolhouse and, in 1857, a church. It was dismantled in Coalville and transported stone by stone to its new location.

Among the many other items in the Village are a one-room schoolhouse, a two-story sawed log house, smokehouse, millinery shop, clock shop, tool museum, hardware store, cobbler shop, co-op, print shop, music hall, gingerbread house, doll museum and town hall. Other buildings were actually dismantled and rebuilt for **Pioneer Village** including the log schoolhouse, the Kaysville Railway Station and the Maw home at the Village entrance. A telephone exhibit displaying the work of Alexander Graham Bell is a fascinating journey through early communication.

"Pioneer Village brings to life the way people lived during the first 100 years of Utah's existence," says Peter Freed of Lagoon. "We must preserve it for future generations." **Pioneer Village** is the result of a year's work of transporting nearly all the buildings and exhibits from a 5-acre residential area of Salt Lake City. This labor of love has seen continual improvements since 1976 and, in the coming years, will continue to grow. Yes, **Pioneer Village** is being preserved for future generations.

# Sky Scraper

*Manufactured by the Nauta Company.*

Located on the North Midway area, the **SKY SCRAPER** hovers above the Park. This enormous ferris wheel is engineered to withstand hurricane force winds, consists of 36 gondolas capable of holding 4-6 passengers each. Requiring 13 semi-trailers to ship it to Lagoon, this ride offers a magnificent view of the valley. The ride, with lights, draws 280kw of electricity. This is equivalent to the power necessary to service 140 homes. The **Sky Scraper** is equipped with a special generator which is capable of operating the ride (without lights).

The **Sky Scraper** is included with Season and Single Day Passports.

## **GENERAL SPECIFICATIONS**

- Highest Height: 150 feet high
- Original Cost: \$1.5 million
- Duration of Ride: 20 minutes (minimum)
- Lights on Ride: 180,000 lights
- Year Installed: 1991

**Lagoon**

# Lagoon's Carousel

Lagoon's **CAROUSEL**, or **MERRY-GO-ROUND**, was manufactured in 1893 by the Herschell-Spillman Company, and is one of fewer than 170 intact wooden carousels in operation for the public today... and the only one in Utah! Since its installation, Lagoon has honored a commitment to maintain the **Carousel** in good condition and preserve its magic for children for the next 100 years to come.

What makes the **Carousel** a priceless attraction is its intricate woodwork. Over 110 years ago, the gifted hands, loving hearts, and forgotten names of master craftsmen and wood carvers created each character separately. These artists were highly skilled; most were European-trained. Russian immigrants were well-known as the most talented of the carvers. Lagoon's 47 carousel animals were

carved from many pieces of wood laminated together with pegs and glue. The most commonly used woods were yellow poplar and bass. After many countless hours of carving, as well as painstaking sanding, painting and finishing, the artist produced just one unique animal, adorned with a wide range of features based on the whim of the carver and painter.

Aside from the popular carousel horses, the **Merry-Go-Round** is host to a menagerie of animals, including a chicken; a delightful little frog in short pants and bow tie; a sea dragon, similar to Coney Island-style sea creatures; a long-horned goat; a zebra without a saddle; a charming cat; a sleeping baby with a bouquet of flowers, nestled in the folds of fabric held by a stork; a lion and a giraffe. The carved figures are adorned with a wide range of subjects including Mother Goose figures, bathing beauties, and the American flag. There is also a patriotic "Uncle Sam" sled, a spinning "love tub" and a Victorian rocker. Some of the figures have glass eyes and are decorated with jewels on the trappings.

An equal amount of craftsmanship was also invested to create intricate carvings and artwork on the structure of the ride which showcased the beautiful animals. Such features include nostalgic landscape paintings, beveled mirrors and light-catching jewels, which were popular at the time.

In 1953, a terrible fire destroyed over 50 percent of Lagoon, and threatened the **Carousel**. Firefighters directed a constant stream of water on the **Carousel** structure to protect it from the roaring fire which loomed just 15 feet away. This near tragedy endeared the **Carousel** to Lagoon's owners and the commitment to its long-term preservation was renewed.

In the Spring of 2003, Lagoon spent many hours getting the **Carousel** ready for its 110th birthday! The restoration of this remarkable work of Victorian art to its original splendor, makes it a highlight of Lagoon.

The **Carousel** is included with your Single Day and Season Passports.

## GENERAL SPECIFICATIONS

- Year Built: 1893
- Arrived at Lagoon: 1906
- Motor: 7.5 horsepower electric motor
- Motor Speed: 1100 Revolutions per minute
- Duration of ride: 1 min. 30 sec.

# Skycoaster

*Designed by Sky Fun 1, Inc.*

*The Skycoaster is an X-Venture Zone attraction and not included with Lagoon's Season and Single Day Passports.*

The **SKYCOASTER** is a sport/amusement attraction designed by Sky Fun 1, Inc. of Boulder, Colorado. The attraction offers all the thrills and excitement of skydiving and hang gliding.

The attraction operates by putting the participant in a full body harness (usually referred to as a flight suit), that supports the flyer (from one to three at a time), in a prone position. The harness is then connected to the flight support cables.

From a static point approximately 6 feet above the ground, the flyers are then pulled aloft by a launch cable to nearly the top of the launch tower. At this point the flyers are approximately 143 feet above the ground with the flight cables taut and the flight is ready to begin. Upon being given the signal, the flyers pull the rip cord, releasing them from the launch cable, and they begin to rapidly swing towards the ground at speeds reaching up to 80 mph. The overall feeling is similar to that of swooping along the ground in a hang glider, or that of skydiving.

## GENERAL SPECIFICATIONS

- Main Arch: 173 feet
- Launch Tower: 153 feet
- Speed: 40-80 mph
- Flight Cables: 2 sets
- Flyers Per Set: 1-3
- Year Installed: 1995

# Double Thunder Raceway

*Double Thunder Raceway is an X-Venture Zone attraction and not included with Lagoon's Single Day Passport.*

New during the 2000 season, the **DOUBLE THUNDER RACEWAY** consists of side-by-side go-kart tracks that serpentine over a course of nearly half a mile. The **Lightning Track** and the **Thunder Track** are independent tracks with several sweeping turns, overpasses, 360 degree spirals, straight-aways, and camel-backs.

Each track will accommodate 28 go-karts operating in two heats simultaneously. Both tracks and all go-karts are equipped with a remote control safety system, ground control speed devices, and traffic signal lights to indicate the status of the track.

## **GENERAL SPECIFICATIONS**

Length of Track

Type of Go-Kart

Number of Go-Karts

Go-Kart Engines

Driver Restraint System

Duration of Ride Cycle

## **Lightning Track**

1,146 feet
